INTRAVENOUS FLUID TRANSFUSION ISSUE FROM JUNIOR WORLD CHAMPIONSHIPS 2019 TALLINN, ESTONIA 12.-18.08.2019

Mika Lehto, MD

mika.lehto@hus.fi

At 16th August from training/warming up area was found an empty infusion bottle of “RINGERS” with infusion line and needle. It was found from a place that is not cleaned every day, so the date of the removal the infusion system cannot be identified. The named place is not registered on surveillance camera.

It seems, that there has been an intravenous fluid transfusion issue during the competition, that is prohibited according to the WADA-rules.
